

# Congratulations

Thank you for making a serious change. You are now the proud owner of a 100% recycled plastic product. All products are handmade by using HDPE (2) and LDPE (4) plastic in Newcastle NSW.

Our plastic is sourced from around New South Wales and Victoria from councils, recycling plants and the general public. We then create our products by moulding and cutting them into a variety of shapes and sizes.

The colours you see are currently what has been thrown away. We do not add anything to our plastic, so what you see is exactly how we received it. Colours will vary, depending on what we can get our hands-on.

Our products range from 0.3kg of plastic through to 15kg so each purchase is saving unwanted plastic from ending up in landfills.

Check out our website - <https://resourcefulliving.com.au/colour-swatches> to see what all the colours were previously.

We take using single-use plastic really serious, so we want you to know that the wrap that we use when sending our products is a landfill-biodegradable hand stretch wrap that can be recycled or disposed of in the general rubbish bin. Once disposed to landfill biodegradation is accelerated approximately 90+% faster than conventional hand stretch wrap, producing an organic matter (a natural fertiliser) and no microplastics.

We are proud to be an Australian company making a difference!

Thank you for your support, together may we make big change.

*Thank you,  
Geoff & Jess & Sarah*
