

Site Waste Audit Checklist

Identify circular procurement opportunities in 30 minutes

Waste Stream Identification

- What plastic types are generated?
- Estimated volume per week/month?
- Current disposal cost per tonne?
- Contamination issues?

Storage & Handling

- Is plastic segregated?
- Is it baled, bagged or loose?
- Who manages removal?

Procurement Review

- What materials are purchased monthly?
- What items are frequently replaced?
- Which materials fail due to weather?

Quick Win Assessment

- Can any items be replaced immediately?
- Is a pilot feasible in next 90 days?

Next Steps

Following the completion of this checklist, consider:

- **Prioritising** identified opportunities based on feasibility and impact.

- **Consulting** with procurement teams to explore alternative materials and suppliers.
- **Implementing** pilot programs to test circular procurement solutions on a smaller scale.
- **Monitoring** the results of implemented changes and adjusting strategies as needed.
